

Can EHR data be used as a public health tool to improve Hepatitis C outcomes?

POPULATION LEVEL:

- Dashboard cascade—“focused” breakdown of data
- Qualitative assessment of Lessons Learned for HCCN usage
- Exploratory use by Public Health agency partner
- Community Surveillance

HEALTH CENTER LEVEL:

- Alignment of HepC care workflow with cascade elements
- Increased/improved utilization of EHR fields and structures
- Development operational end points, clinical workflow, and aligned dataflow
- Use of a local dashboard to address each cascade pillar
