# CARE MANAGEMENT LEADERSHIP

#1 ACTIVITY:

1. Review all population data available to you and complete a summary of available data.
   a) Identify owner of all data sources at your clinic/center
   b) Understand the process for data requests and culture of optimizing data
   c) Understand current process for reporting and reviewing data
2. Identify any data gaps – consider a care management wish list.
3. Review available data and summarize what it tells you about the care management population.
4. Use this review to update/validate your care management goal/goals.
